

Melitta® Cafina® CT8

Fast and reliable.

Melitta Professional
Coffee Solutions

cafi^{na}® CT8

With the Melitta® Cafina® CT8 you can dispense a range of customised coffee/milk products, from Espresso to White Coffee and Latte Macchiato or even decaffeinated Cappuccino. The hourly capacity of 200 cups/hour guarantees the fast and efficient preparation of your orders, even at the busiest times.

A precise and powerful grinder with high-quality steel grinding disks ensures the best grinding results and a long life time. Our advanced technology safeguards your coffee quality in the cup.

Compact design

The Melitta® Cafina® CT8 combines the latest technology and ease of operation with the smallest footprint in a unique, modern design.

10,4" Touchscreen Display

Convenient, large and individually programmable touchscreen display.

Innovative milk system with cold milk foam

The innovative new milk system in the Melitta® Cafina® CT8 makes it possible to dispense various kinds of hot and cold milk foam.

Automatic Coffeequality System (ACS®)

Variations in coarseness, quantity of powder, pressure, water temperature and brewing time are monitored and automatically corrected.

Variable Pressure System (VPS®)

In order to ensure the best possible coffee quality, the contact pressure can be set individually for each coffee speciality, up to a maximum of 1500 Newton.

Quality and reliability

The Melitta® Cafina® CT8 has a convincing level of reliability and robustness. The use of high-quality and long-lasting components ensures that the Melitta® Cafina® CT8 won't let you down.

Cleaning in Place (CIP®)

Maximum cleanliness in accordance with HACCP standards (submitted) thanks to the fully automatic cleaning of all milk pipes.

An informative video will tell you all about the technology and functions of the Melitta® Cafina® CT8.
